Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Price = \$5.00 Local GMO
 n/a non-GMO

Test Comments: Emergence was excellent at this location, but the rest of the season continued to add to disappointing yield levels. Water is a primary limiting factor in corn. Tip back was terrible here, most ears were not much more than 5" long. Stalks were starting to cannibalize themselves, and there appeared to be Fusarium present. Hybrids that handle stress well, worked there way to the top of this data set.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
